

## PATHOLOGIST POSITION

StageBio ([www.stagebio.com](http://www.stagebio.com)) is a leading global provider of GLP-compliant clinical research and preclinical necropsy, histology, pathology, image analysis and specimen archiving services for the biopharmaceutical, medical device and contract research industries. In addition to a GLP/GCLP-compliant lab facility in Germany, we operate locations in VA, OH, MA and MD, with continued investment in facility and technology infrastructure planned to meet the demand for high-quality histopathology services. A growing team of board-certified Veterinary Pathologists, as well as over 75 laboratory technicians, are employed in support of our unified international commitment to quality, scientific integrity and client satisfaction.

StageBio is seeking a full-time, experienced, board-certified veterinary pathologist to join our growing Medical Device team. Experience in medical device pathology not required and mentoring will be provided. Remote work eligibility is based on level of experience. The ideal candidate for this position appreciates a high level of study variety and is suited to work in a flexible environment where technology is used not only for scientific purposes but also to keep the pathology team connected. We offer talented support staff, work-life balance, paid time to work on publications, and opportunities to interact with some of the top Pathologists in the industry! Apply today for immediate consideration! Support available for relocation to Frederick, MD.

### Primary Responsibilities Include:

- Serve as Principal Investigator and Study Pathologist for microscopic and macroscopic tissue assessment and reporting of anatomic pathology findings in both GLP and Non-GLP preclinical studies.
- Collaborate with other StageBio Pathologists in multi-specialty preclinical studies and participate in internal and external peer reviews.
- Work closely with laboratory personnel, overseeing trimming, imaging and histology conduct. Occasional trimming of study tissues.
- Ensure GLP compliance for all work performed.
- Interact with Study Directors/clients as needed.
- Maintain continuing education through professional association affiliations, participation in relevant conferences and/or publication efforts.
- Participate in Pathology Peer Review as needed.
- Capture and annotate photomicrographs for inclusion in pathology reports.

### Requirements:

- DVM/VMD degree and ECVP/ACVP (Anatomic Pathology) board certification. PhD or MS welcomed but not required
- Minimum of 3 years of work experience as a board-certified veterinary pathologist in a GLP research and/or toxicology environment preferred
- Ability to travel for professional meetings and/or occasional necropsy services preferred
- Excellent technical writing and communication skills
- Experience with GLP peer reviews preferred

StageBio offers a comprehensive benefits package that includes employer sponsored health insurance, short-term and long-term disability, AD&D, life insurance for employees and dependents, flexible paid time off, 401(k) with match and paid holidays.
